Terms and Conditions of Use

Your access to and use of this Clinical Trials Portal Site is subject to the following terms and conditions and all applicable laws. By accessing and browsing this Site, you accept, without limitation or qualification, these Terms and Conditions.

Disclaimers

Endorsement

This Portal is provided to you as a service and will enable you to search for ongoing clinical trials or results of clinical trials sponsored by IFPMA company members and posted either on companies' sites or posted by companies on third-party web sites.

IFPMA does not control or give endorsement to these web sites or medicinal products mentioned therein and is not responsible for the contents of any searched or linked site or any link contained in a searched or linked site, or any changes or updates to such sites, nor is IFPMA responsible for the availability of access to such sites. IFPMA is not responsible for the privacy policy of any third-party website.

Medical Information: Warning

Publicly available information on medicinal products or on clinical trials should not be interpreted as advice or recommendation and does not replace the advice of a health care professional regarding the use of a given medicinal product or the participation in a clinical trial as a treatment option for a particular patient. If you have questions regarding information on medicinal products or on clinical trials, please consult a physician.

A reference to a medicinal product used in a clinical trial does not imply that such product always is or will be available, as products may not be approved for use in a given country or their use may be restricted to certain indications. Therefore, the local prescribing and labeling information should be consulted.

Use of Data

The data accessed via this Clinical Trial Portal are being supplied for information purposes in the interest of science. No commercial use is to be made of any of the data accessed via this Clinical Trial Portal, without the consent of the owner of the data. In particular, and even though it is not considered that such data can supply sufficient data for this purpose, no use shall be made of such data, without consent, to form the basis of an application to any regulatory authority anywhere in the world seeking an authorization of any kind for any medicinal product.
